EXAMINER'S COMMENT AND STATEMENT OF REASONS FOR ALLOWANCE

Response to Arguments

Applicant's arguments filed 1/23/06 have been fully considered and found persuasive. In particular, Applicant argues (response, page 6) that the cited prior art of record (*Taylor*) does not disclose "said encoder only determining a coarse determination of a measured value made during the auxiliary mode of operation." Rather, *Taylor* teaches utilizing low and high sampling frequencies during a power failure to determine whether the resolvers have moved. This is not equivalent to only obtaining coarse measurement values.

Allowable Subject Matter

Claims 17-32 are allowed.

The following is an examiner's statement of reasons for allowance: the cited prior art of record does not teach or fairly suggest an absolute measuring system for determining angles or paths comprising, along with the other claimed features, an encoder being switched to an auxiliary mode and receiving an auxiliary voltage and uses less energy when said main voltage supply fails, said encoder only determining a coarse determination of a measured value made during the auxiliary mode of operation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
